EDUCATION

Ph.D. in Astrophysics

Sep. 2017 - present

Department of Astronomy, Xiamen University, Fujian, China
- Advisor: Prof. Taotao Fang

Bachelor of Science in Physics

Sep. 2012 - Jun. 2016

Department of Physics, Guangzhou University, Guangdong, China

RESEARCH INTERESTS

Galaxy Formation and Evolution, Circumgalactic Medium, Gas Recycling and Star Formation of Galaxies, Galaxy Interactions and Mergers, HI Absorption Survey towards Radio AGN

ACCEPTED PROPOSALS

PI, 12.6 h, FAST

2021

PT2021_0067, A Pilot Survey of HI Absorption in faint radio AGNs

PI, 17.8 h, IRAM 30 m

2021DDT

E01-21, Unveiling the cold Gas Evolution of MaNGA Merging Galaxies

PI, 21 h, JCMT

2021B

M21BP051, Probing the Cold Gas Evolution of MaNGA Merging Galaxies

PI, 1 night, P200/Hale

TAP 2021B

CTAP2021-B0019, Probing the Circumgalactic Medium of Galaxy Mergers with Deep H α Imaging

PI, 11 h, GBT

2021A

GBT-21A-245, Probing the HI content of Merging Galaxies in MaNGA

PI, 1 night, P200/Hale

TAP 2021A

CTAP2021-A0034, Probing the Circumgalactic Medium of Galaxy Mergers with Deep H α Imaging

PI, 4 h, FAST

2020

PT2020.0152, Probing the HI content of Merging Galaxies in MaNGA

Co-I, 26 h, FAST

2021

PT2021_0040, Unveiling the Interaction between the Magellanic Stream and the Milky Way's Circumgalactic Medium

Co-I, 30 h, FAST

2021

PT2021_0139, Search for Extragalactic HI Absorption Systems in the Redshift Range of 0.25-0.35

Co-I, 2 h, FAST

2021

PT2021_0120, Two Quiescent Close Binary Systems that Contain a Candidate Neutron Star

Co-I, 11 h, FAST 2020
PT2021.0186, Probing the HI Gas Contents of Transitional Galaxies Indicated by the [N II]/[S II] ratios

Co-I, 3 h, FAST 2020
PT2021.0147, Direct Observation of the HI Disk of Massive Spiral Galaxy: A Pilot Study of NGC 891

Co-I, 7 h, FAST Shared risk 2019
2019a-005-S, Connecting the Circumgalactic Medium and the HI content of the redshift ~ 0.2 galaxies: A pilot study

OBSERVING EXPERIENCE

Radio single-dish spectroscopy and mapping:

[FAST](#), HI spectral line observations of nearby galaxies, pool, 38 h
[FAST](#), HI mapping of high-velocity clouds, pool, 26 h
[GBT](#), HI spectral line observations of nearby galaxies, pool, 11h
[IRAM 30m](#), CO spectral line observations of nearby galaxies, remote, 42 h
[JCMT](#), CO spectral line observations of nearby galaxies, pool, 21 h
[Parkes](#), HI spectral line observations of nearby galaxies, remote, 22 h

Optical imaging and spectroscopy:

[P200/Hale](#), narrow-band imaging of nearby galaxies with WaSP, remote, 2 nights
[P200/Hale](#), spectroscopic observations of nearby galaxies with DBSP, remote, 1 night

SKILLS

Languages: Chinese, English
Programming: Python, IDL, Matlab
Software & Tools: GBTIDL, Starlink, MIRIAD, IRAF, GILDAS

COMMUNITY SERVICE

Member of the FAST User Committee
