ORCID: 0000-0003-3230-3981

## EDUCATION

---

### Ph.D. in Astrophysics

Sep. 2017 - present

*Department of Astronomy, Xiamen University, Fujian, China*  
- Advisor: Prof. Taotao Fang

### Bachelor of Science in Physics

Sep. 2012 - Jun. 2016

*Department of Physics, Guangzhou University, Guangdong, China*

## RESEARCH INTERESTS

---

Galaxy Formation and Evolution, Circumgalactic Medium, Gas Recycling and Star Formation of Galaxies, Galaxy Interactions and Mergers, HI Absorption Survey towards Radio AGN

## ACCEPTED PROPOSALS

---

### PI, 39 h, IRAM 30 m

2022A

029-22, Unveiling the cold Gas Evolution of MaNGA Merging Galaxies

### PI, 12.6 h, FAST

2021

PT2021\_0067, A Pilot Survey of HI Absorption in faint radio AGNs

### PI, 17.8 h, IRAM 30 m

2021DDT

E01-21, Unveiling the cold Gas Evolution of MaNGA Merging Galaxies

### PI, 21 h, JCMT

2021B

M21BP051, Probing the Cold Gas Evolution of MaNGA Merging Galaxies

### PI, 1 night, P200/Hale

TAP 2021B

CTAP2021-B0019, Probing the Circumgalactic Medium of Galaxy Mergers with Deep H $\alpha$  Imaging

### PI, 11 h, GBT

2021A

GBT-21A-245, Probing the HI content of Merging Galaxies in MaNGA

### PI, 1 night, P200/Hale

TAP 2021A

CTAP2021-A0034, Probing the Circumgalactic Medium of Galaxy Mergers with Deep H $\alpha$  Imaging

### PI, 4 h, FAST

2020

PT2020.0152, Probing the HI content of Merging Galaxies in MaNGA

### Co-I, 26 h, FAST

2021

PT2021\_0040, Unveiling the Interaction between the Magellanic Stream and the Milky Way's Circumgalactic Medium

### Co-I, 30 h, FAST

2021

PT2021\_0139, Search for Extragalactic HI Absorption Systems in the Redshift Range of 0.25-0.35

**Co-I, 2 h, FAST** 2021  
PT2021.0120, Two Quiescent Close Binary Systems that Contain a Candidate Neutron Star

**Co-I, 11 h, FAST** 2020  
PT2021.0186, Probing the HI Gas Contents of Transitional Galaxies Indicated by the [N II]/[S II] ratios

**Co-I, 3 h, FAST** 2020  
PT2021.0147, Direct Observation of the HI Disk of Massive Spiral Galaxy: A Pilot Study of NGC 891

**Co-I, 7 h, FAST** Shared risk 2019  
2019a-005-S, Connecting the Circumgalactic Medium and the HI content of the redshift  $\sim 0.2$  galaxies: A pilot study

## OBSERVING EXPERIENCE

---

### Radio single-dish spectroscopy and mapping:

[FAST](#), HI spectral line observations of nearby galaxies, pool, 38 h  
[FAST](#), HI mapping of high-velocity clouds, pool, 26 h  
[GBT](#), HI spectral line observations of nearby galaxies, pool, 11h  
[IRAM 30m](#), CO spectral line observations of nearby galaxies, remote, 42 h  
[JCMT](#), CO spectral line observations of nearby galaxies, pool, 21 h  
[Parkes](#), HI spectral line observations of nearby galaxies, remote, 22 h

### Optical imaging and spectroscopy:

[P200/Hale](#), narrow-band imaging of nearby galaxies with WaSP, remote, 2 nights  
[P200/Hale](#), spectroscopic observations of nearby galaxies with DBSP, remote, 1 night

## SKILLS

---

**Languages:** Chinese, English  
**Programming:** Python, IDL, Matlab  
**Software & Tools:** GBTIDL, Starlink, MIRIAD, IRAF, GILDAS

## COMMUNITY SERVICE

---

Member of the FAST User Committee

## PUBLICATIONS

---

**Yu** et al., *On the HI Content of MaNGA Major Merger Pairs*, submitted to ApJ.  
Zhang B., Zhu M., Wu Z.-Z., **Yu Q.-Z.**, et al., *Extragalactic HI 21-cm absorption line observations with the Five-hundred-meter Aperture Spherical radio Telescope*, 2021, [MNRAS](#), 503, 5385
